

# Sinatra

[www.sinatrarb.com](http://www.sinatrarb.com)

*Good Afternoon!*

# What is Sinatra?

*“Sinatra is a DSL for quickly  
creating web-applications in  
Ruby with minimal effort.”*

```
require 'rubygems'  
require 'sinatra'
```

```
get '/' do  
  'Hello world!'  
end
```

```
require 'rubygems'  
require 'sinatra'
```

```
post '/' do  
  'Create a new world!'  
end
```

```
require 'rubygems'  
require 'sinatra'  
  
put '/' do  
  'Update the world!'  
end
```

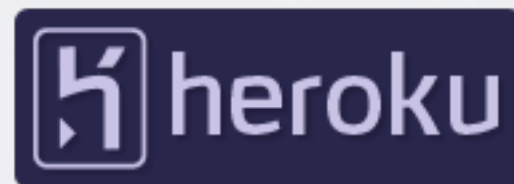

```
require 'rubygems'  
require 'sinatra'
```

```
delete '/' do  
  'Delete the world!'  
end
```

Why would I use it?

# Who else uses Sinatra?

entp

*“Exposed simplicity instead of hidden complexity.”*

*—Adam Wiggins, RubyConf 2008*

Let's try it out!

*Thanks for your time!*
