

Sinatra

www.sinatrarb.com

Good Afternoon!

What is Sinatra?

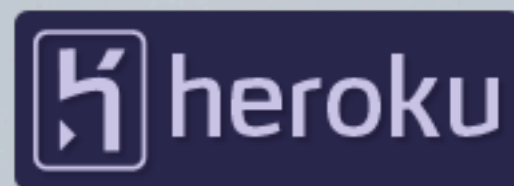

*“Sinatra is a DSL for quickly
creating web-applications in
Ruby with minimal effort.”*

```
require 'rubygems'  
require 'sinatra'
```

```
get '/' do  
  'Hello World!'  
end
```

Why would I use it?

Who else uses Sinatra?

entp

Let's try it out!

Thanks for your time!
